Status of Application

1. Applicant's amendment, filed Nov. 16, 2009, has been entered in the application. Claims 1-7, 9-31 and 41-50 remain pending.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7, 9-12, 15-29, 31 and 41-50 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-33 of U.S. Patent No. 7,073,804. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims cover the same structures and mechanisms as claimed in the instant application using slightly varying terminology (e.g., "connector" in place of "fastener").

Allowable Subject Matter

3. Claims 13, 14, and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Note that the only rejections advanced against the pending claims 1-7, 9-12, 15-29, 31 and 41-50 are obviousness-type double patenting rejections, and as such, upon the filing of a terminal disclaimer, it appears as though all claims would be in condition for allowance.

Comment

5. Note that the claims are now subject to rejection under the doctrine of obviousness-type double patenting in view of U.S. Patent 7,073,804, which issued after the last office action immediately before the appeal proceeding.

Art Unit: 3618
